

The Ultimate Driving Machine®

BMW ADVANCED CAR EYE 2.0

The full-HD wide-angle camera automatically records certain driving situations. The detailed video is also saved automatically. Various sensors on the light-sensitive camera, as well as excellent signal processing, mean the camera is capable of recording high-quality images during the day and at night. The highly sensitive GPS receiver enables recording of the road and speed. The G sensor detects impacts. Ambient movements are detected and analyzed by radar technology. The design of the Advanced Car Eye 2.0 match the BMW vehicle design and therefore looks perfectly at home in the vehicle.

Each price is the suggested retail price and is subject to change. Unless otherwise stated, price excludes installation and taxes. Installed prices are based on an estimated installation time and the center's labor rate, and are subject to change. Due to the number of variables that ultimately determine freight costs, FREIGHT CHARGES ARE ESTIMATED until an order is shipped and actual freight charges are calculated. Check with your authorized BMW center for complete accuracy of information and product availability.
